

Supply Chain Management Major - Newark

The Field

Supply Chain Management is how business gets done. Supply chain management spans all movement and storage of raw materials, work-in-process inventory, and finished goods from origin to consumption.

According to the Bureau of Labor Statistics, Supply Chain Management is projected to continue to be one of the fastest growing industries for employment over the next ten years. Countless firms rely on new technologies and the coordination of processes to expedite the distribution of goods.

The use of computers to analyze work routines in order to optimize the use of available labor has led to increases in productivity. Modern systems development and related processes have created an entirely new set of integrated operations management functions, which require positions such as managers of supply chains, resource managers of material or manufacturing resources planning, and process and inventory control managers.

The Supply Chain Management major offers students the comprehensive knowledge and technological skills they need in order to ensure employment in leading supply chain management roles.

Career Paths

The new generation of business school graduates who are competent and well-prepared, with solid knowledge in both supply chain management and marketing/sales management, are in high demand across all industries. Supply Chain Management students are prepared for positions such as procurement/sourcing manager, logistics planner, supply management analyst, acquisition project analyst, marketing analyst, and sales/distribution managers. Industries such as pharmaceutical and healthcare are investing heavily in supply chains that achieve new heights of efficiency and productivity.

Compensation

According to the 2019 U.S. Bureau of Labor *Occupational Outlook Handbook*, supply chain professionals with a bachelor's degree earned a median salary of \$74,750.

*Note: Students must select either Internship in Supply Chain Management, Co-op in Supply Chain Management, or SCM Industry Client Projects as a required SCM course.

If more than one of these courses are taken, 3 credits will be counted towards Required SCM courses, 3 credits will be counted towards Elective SCM courses, and any credits beyond these 6 credits will be counted as general elective credits.

Under no circumstances can any combination of these three courses account for more than 3 Required SCM credits and 3 Elective SCM credits for the Major in Supply Chain Management.

Co-op in Supply Chain Management is a 6 credit course which will be split between Required SCM, Elective SCM, and general elective credits depending on whether either or both Internship in Supply Chain Management and/or SCM industry Client Projects courses are taken.

*AR = Credits by arrangement.
