

Ian Davidson, Ph.D., MBA

Consultant in Drug Development, Project Leadership, and Management

Ian Davidson is a consultant in the area of drug development, after having spent a career of 30 plus years working in pharmaceutical R&D.

He was formerly Vice President, Project Direction at Sanofi Pharma, responsible for heading teams of project leaders and managers in the development of new drugs in therapeutic areas including respiratory, immuno-inflammation, diabetes and infectious diseases.

His early career was spent in the management of departments of analytical chemistry within pharmaceutical development, in both the US and UK. He was active in industrial and professional groups within this field.

His academic qualifications include a BSc degree in Chemistry, MSc and PhD degrees in analytical chemistry, all from London University, UK, and an MBA from Rockhurst University, US.
